OBJECTIVE

I am a final-year Computer Science student, driven by a passion for programming, adept in Data Structures and Algorithms. I am eager to leverage my technical proficiency and project experience in a vibrant, collaborative setting. My goal is to tackle real-world software development challenges, expand my professional toolkit, and further my learning through practical application

EDUCATION

B.TECH in Computer Science, Vignan's Foundation for Science, Technology Research Expected 2026
CGPA: 7.52

Intermediate (MPC), Sri Chaitanya Junior College 2020 - 2022
CGPA: 7.30

PROJECTS

Predicting Restaurant Ratings through Regression Analysis Approach *Sept–Nov 2024*

- Built a predictive system to estimate restaurant ratings using supervised learning algorithms including **Random Forest, SVM, and KNN**.
- Preprocessed real-world datasets to extract meaningful features such as cuisine type, location, pricing, and customer reviews. Compared model performances to identify the most accurate approach, emphasizing the impact of **model selection and feature engineering**.
- Aimed to assist users in discovering high-quality restaurants and help businesses improve service quality through **data-driven insights**.

Video Summarization using Image Processing Techniques *Jan–Apr 2025*

- Developed a system to automatically generate concise summaries of long videos using keyframe extraction and scene change detection.
- Leveraged **Python** and **OpenCV** for frame sampling, histogram-based comparison, and content-aware analysis to detect significant transitions.
- Applied clustering techniques to select representative frames, reducing redundancy and preserving semantic meaning. Aimed to enhance content navigation and viewing efficiency in surveillance, education, and media applications through **efficient visual summarization**.

TECHNICAL SKILLS

Programming Languages	C, Java, Python, HTML, CSS, JavaScript
Frameworks	React JS, Node JS, Express JS
Databases	MySQL, MongoDB
Tools	Git/GitHub, VS Code, Jupyter Notebook, Google Colab, Eclipse
Academic Coursework	Data Structures, Operating Systems, Computer Networks, OOP, DBMS
Certifications	Generative AI (Google), Introduction to packet tracer, Network Basics, (Cisco)

POSITIONS OF RESPONSIBILITY

- Worked as a coordinator for MAHOTSAV, which is an annual national-level festival hosted by Vignan's Foundation for Science, Technology Research. As a coordinator, I was responsible for participant registrations, coordinating schedules, contributing to the event's overall success.
