EDUCATION

•Bachelor of Technology in Computer Science and Engineering	2022 – Present
Vignan’s Foundation for Science, Technology and Research Guntur	CGPA: 8.02 (Till 6th Semester)
•Higher Secondary Education (HSC), 12 th	May 2022
Kendriya Vidyalaya No.2, SVN, Visakhapatnam	Percentage – 83%
•Secondary School Certificate (SSC), 10 th	March 2020
Kendriya Vidyalaya No.2, SVN, Visakhapatnam	Percentage – 88%

PROJECTS

- Conference Paper - Credit Card Fraud Detection (ICSCNA 2024) 
Published research on improving fraud detection accuracy using machine learning techniques.
 - Designed and implemented a **machine learning solution** for credit card fraud detection on highly imbalanced datasets, improving detection accuracy and reliability in real-world financial transactions.
 - Published peer-reviewed research in **IEEE Xplore** at the International Conference on Smart Computing and Networking Applications (ICSCNA 2024), showcasing advancements in **fraud detection using ensemble learning** and **data balancing techniques**.
 - Developed an **ensemble-based approach** on a dataset of **284,807 transactions**, including **492 fraud cases (0.17% fraud rate)**.
 - Applied **SMOTE oversampling** to balance the dataset, improving minority class representation and increasing **recall from 0.52 to 0.87**.
 - Achieved **99.93% accuracy**, **0.81 F1-score**, and **0.87 recall**, outperforming baseline models.
 - Visualized model performance and **class imbalance** using Matplotlib to communicate results effectively.
- MERN Stack Developer Project – Student Magazine Platform 
Developed a **MERN stack-based platform** for students to publish articles, share news, and engage with campus updates.
 - Implemented secure **user authentication with JWT** and **role-based access control**, enabling distinct privileges for coordinators and admins.
 - Built a robust **content management system (CMS)** enabling users to create, edit, and manage articles efficiently.
 - Integrated **interactive features** such as commenting, user profiles, and personalized dashboards to boost user engagement.
 - Technologies Used: **React.js, Node.js, Express.js, MongoDB, Cloudinary, JWT Authentication.**

TECHNICAL SKILLS

Languages: Java (Strong), C (Intermediate), Python (Familiar)
Cloud/Databases: MySQL (Strong), MongoDB (Familiar)
Cloud: AWS Cloud Services Fundamentals
Relevant Coursework: Data Structures & Algorithms, Database Management System, Software Engineering, Object-Oriented Programming System, Machine Learning

CERTIFICATIONS

•Certified in AWS Cloud Practitioner	2025
•Attended Amazon Summer ML School	2025
•Qualified in TCS CodeVita	2024
•Certified with B1 Level in PET Exam conducted by Cambridge University	2022

POSITIONS OF RESPONSIBILITY

- Coordinator – VCODE Department FEST 2025
 - Planned and managed VCODE, the annual technical fest of the Computer Science Department.
 - Oversaw the execution of 5 events, including coding contests, a Hackathon, and technical quizzes, drawing over 600 participants.
- Vice President – ALMA Club 2024
 - Directed club operations and led strategic technical and non-technical initiatives to drive student engagement and organizational growth.
 - Facilitated 25+ diverse events, including technical workshops, expert speaker sessions, coding marathons, and peer-learning meetups, significantly boosting student participation.
