

EDUCATION

Degree	Specialization	Institute	Year
B.Tech	Computer Science & Engineering	Vignan's Foundation for Technology and Research	Science 2022 – Present (8.41*)
MPC BIEAP	Physics, Chemistry, & Mathematics	Narayana Junior College	2022 (95%)
10 TH - ICSE	-	St.Joseph's High School	2020 (86%)

PROJECTS

- Hybird Deep Learning Approach for Robust Fake News Detection** November -2024
 - Designed a hybrid deep learning model (CNN + LSTM/BiLSTM + ANN) to detect fake news with higher accuracy.
 - Used Count Vectorization and TF-IDF for effective feature extraction and improved classification performance.
 - Improved model accuracy and reduced errors in fake news classification..
 - Published research on fake news detection in an IEEE conference, contributing to the fight against digital misinformation.
- Travel Booking System using the MERN Stack** May -2025
 - Developed a full-stack travel booking platform using the MERN stack with user authentication and secure API integration.
 - Implemented responsive and dynamic UI using React.js with reusable components for destinations, packages, and bookings.
 - Built RESTful APIs in Node.js/Express and integrated MongoDB for managing users, trips, payments, and reservations.
- Leveraging Synthetic Data and Hybrid Deep Learning for Next-Gen Customer Churn Prediction** December - 2025
 - Developed a deep learning-based model to predict customer churn using big data analytics.
 - Used CTGAN-ENN, Bi-LSTM, and BERT to improve prediction accuracy.
 - Achieved highest accuracy in predicting churn and reducing errors.

CERTIFICATIONS

- Cambridge Preliminary English Test:**
Intermediate-level English proficiency, showcasing practical language skills for everyday use, including reading, writing, listening, and speaking. This qualification is recognized globally and is a valuable asset for work, study, and travel.
- Lingua Skill Business – B1 Proficiency:** I have completed the Lingua Skill Business certification, achieving a B1 level proficiency in business communication. I scored an average of 153 marks, demonstrating strong skills in professional language and effective communication in business contexts.
- Vulnerability Management Detection and Response (VMDR) Certification:** Certification in Vulnerability Management Detection and Response (VMDR) provided practical knowledge in identifying and assessing security vulnerabilities. It covered methods for effective detection, analysis, and response to potential threats. This training enhanced my skills in proactive cybersecurity management.
- Cisco Networking Academy Certifications:** Completed multiple certifications in networking, cybersecurity, and Python programming, including CCNA, Python Essentials 1 & 2, and Cybersecurity Essentials.

TECHNICAL SKILLS

- Languages:** C, Java, Python, MySQL
