Professional Summary

Detail-oriented Backend Developer with experience in building scalable systems, developing predictive models, and delivering data-driven solutions.

Technical Skills

- Flask
- Git
- Python
- REST APIs
- TensorFlow
- AWS
- Microservices
- Docker

Professional Experience

ML Engineer Intern – Trained predictive models and performed hyperparameter tuning.

Key Projects

- Built Resume Ranking Engine using NLP, TF-IDF, and Cosine Similarity for JD matching.
- Designed Scalable REST APIs deployed using Docker on AWS EC2.

Certifications

- Google Professional Data Engineer
- IBM Data Science Professional Certificate

Achievements

- Solved 500+ problems on competitive coding platforms.
- Improved model performance by 20% through feature engineering.

Education

M.Tech in Data Science – 2024 – CGPA: 9.0/10
