EDUCATION

•Vignan's Foundation for Science, Technology and Research, Guntur	2022 – Present
Bachelor of Technology in Computer Science and Engineering	CGPA – 8.46 (Till 6th Semester)
•Higher Secondary Education (HSC), 12 th	May 2022
Kendriya Vidyalaya No.2, SVN, Visakhapatnam	Percentage – 87.2%
•Secondary School Certificate (SSC), 10 th	March 2020
Kendriya Vidyalaya No.2, SVN, Visakhapatnam	Percentage – 89.4%

PROJECTS

•Credit Card Fraud Detection (IEEE Xplore)	Technologies: Python, Scikit-learn, SMOTE, Random Forest
ICSCNA 2024	
– Designed and implemented a machine learning solution to detect fraudulent credit card transactions in highly imbalanced datasets. – Published research at the International Conference on Smart Computing and Networking Applications (ICSCNA 2024). – Proposed an ensemble machine learning approach for fraud detection on a dataset of 284,807 transactions, including only 492 fraud cases (0.17%). – Achieved 99.93% accuracy, 0.81 F1-score, and 0.87 recall, significantly improving fraud detection compared to baseline models. – Applied SMOTE oversampling to balance the dataset, which improved minority class representation and increased recall from 0.52 to 0.87. – Visualized fraud detection results using Python (Matplotlib) to highlight class imbalance and model performance.	
•Alumni Website (MERN Stack) [🔗]	Technologies: React.js, Node.js, Express.js, MongoDB, WhatsApp Cloud API, Nodemailer
2025 – Present	
– Developed a full-stack alumni engagement platform enabling the university and alumni to connect, share updates, and stay informed about events. – Implemented WhatsApp Cloud API for automated, real-time birthday notifications, improving alumni engagement. – Integrated Nodemailer for automated bulk email distribution of event updates and birthday wishes, enhancing communication efficiency. – Designed a structured MongoDB database to store alumni information for reliable data access.	

TECHNICAL SKILLS

Programming Languages: Java (Strong), C (Intermediate), Python (Familiar)
Databases: MySQL (Strong), MongoDB (Familiar)
Cloud: Cloud Services Fundamentals (AWS)
Coursework: Data Structures & Algorithms, Object Oriented Programming, Database Management Systems, Machine Learning

CERTIFICATIONS

Preliminary English Test (Level B1) – Certified by Cambridge University (Score: 158/170) (2022)
AWS Certified Cloud Practitioner – Amazon Web Services (2025)

POSITIONS OF RESPONSIBILITY

•Member, Alumni Club Vignan University	July 2023 – Present
– Contributed to the planning and execution of 20+ alumni engagement programs, bridging connections between current students and graduates. – Maintained ongoing communication with alumni and supported initiatives to enhance network participation and retention.	
•Social Media Coordinator – Department of CSE Vignan University	July 2023 – Present
– Directed content creation for the department's Instagram and LinkedIn profiles, leading to increased visibility and engagement. – Worked closely with student and faculty teams to highlight academic initiatives, student achievements, and departmental highlights. – Designed and published 40+ posts, reels, and stories using Canva to create compelling visual content.	
•Event Coordinator – VCode Fest, Department of CSE Vignan University	April 2025
– Managed operations for VCode Fest 2025, the flagship technical event of the CSE Department, attracting 300+ participants across 6 events. – Coordinated 3 coding contests, 2 hackathons, and 1 tech quiz, ensuring 100% on-time execution. – Led a team of 15 student volunteers to finalize event schedules, prepare judging rubrics, and assist participants during the events.
