Projects

Facial Photo Blending System (GAN-based)

Implemented a Generative Adversarial Network (GAN) in Digital Image Processing to convert facial photos into sketches and reconstruct them with high fidelity. Enhanced visual quality and reduced reconstruction error compared to baseline CNN models.

AI Based Smart Loan Approval

An AI/ML-powered web application that predicts loan approval chances based on applicant details. Built using Logistic Regression and Random Forest models, integrated with Streamlit for real-time predictions.

Tech Stack: ReactJS, Node.js, Express.js, MongoDB, News API

- Designed and developed a full-stack web application to fetch and display real-time news using the News API.
- Implemented advanced features including keyword search, category-based filtering, and responsive routing with ReactJS.
- Engineered a secure backend with Node.js and Express, and managed user preferences using MongoDB.
- Deployed for cloud access with a mobile-friendly, responsive UI for cross-platform usability.

Certifications

• AI Azure Virtual Internship – Edunet Foundation, Microsoft AICTE	2025
