Career Objective

Aspiring Computer Science graduate with strong skills in **programming, problem-solving, and data analysis**, seeking to contribute to **innovative IT solutions** while enhancing technical expertise, collaborating in dynamic teams, and continuously learning emerging technologies.

EDUCATION

Vignan University, Andhra Pradesh, India

Bachelor of Technology in Computer Science and Engineering: CGPA – 7.92/10

Aug 2022 – June 2026

TECHNICAL SKILLS

Languages: C, Java, Python

Tools: Trello, MySQL Workbench

Web Databases: HTML, CSS, MYSQL

Soft Skills: Problem Solving, Leadership, Team-work, Self-learning, Presentation, Adaptability, Communication skills

Projects

- **Heart Disease Prediction Using Unsupervised Algorithms:** Developed an unsupervised machine learning solution to identify heart disease risk profiles by analyzing patient data without labeled outcomes. Utilized K-Means clustering and dimensionality reduction to group patients with similar characteristics and uncover hidden patterns.
Technologies: Python, HTML, Machine Learning

Link

- **Student Management System (MVC):** Built a Java-based application to manage student records using the MVC architecture. Applied Object-Oriented Programming principles and file handling for a modular, maintainable system. Implemented clear separation of Model, View, and Controller layers for scalability.
Technologies: Java

ACHIEVEMENTS

CodeChef: Rating 1221 (4-star), Highest rank 1335, 66 contests

Publication: Published a research paper titled “Heart Disease Prediction Using Unsupervised Algorithms” in *ITM Web of Conferences, Vol. 74, 01005 (2025), ICCPCI-2024*.

Paper Link Certificate

Profiles: Leetcode Codechef GeeksforGeeks

CERTIFICATIONS

NPTEL: E-Business and Management Information Systems (Elite)

NPTEL: Leadership and Team Effectiveness (Elite)

HackerRank: Problem Solving (Basic)
