OBJECTIVE

Highly motivated final-year Computer Science student with strong programming, Data Structures, and Algorithmic skills, seeking to apply my technical expertise and project experience in a dynamic and collaborative environment. Eager to contribute to real-world software development challenges, enhance my professional skill set, and continue learning through hands-on experience

EDUCATION

B.TECH in Computer Science , Vignan’s Foundation for Science, Technology Research	Expected 2026
CGPA: 8.09	
Intermediate (MPC) , Sri Chaitanya Junior College	2020 – 2022
CGPA: 9.48	
SSC , Dr. K.K.R’s Gowtham Concept School	2019 – 2020
CGPA: 10	

TECHNICAL SKILLS

Programming Languages	C, Java, Python, HTML, CSS, JavaScript
Frameworks	React JS, Node JS, Express JS
Databases	MySQL, MongoDB
Tools	Git/GitHub, VS Code, Jupyter Notebook, Google Colab, Eclipse
Academic Coursework	Data Structures, Operating Systems, Computer Networks, OOP, DBMS

CERTIFICATIONS

Technical: Generative AI (Google), Network Basics, Introduction to Cybersecurity, Cisco Certified Network Associate, Python Essentials 1 (Cisco)

Non-Technical Cambridge English: Preliminary (PET), Business English Certificate (BEC), NPTEL – E-Business, NPTEL – Leadership and Team Effectiveness

PROJECTS

Virtual Outfit Customization (MERN Stack)	<i>Aug–Dec 2024</i>
Developed an innovative online fashion platform using MongoDB, ExpressJS, ReactJS, and NodeJS for real-time outfit customization. Enabled users to personalize clothing combinations with live visualization tools , improving the shopping experience. Integrated a rich catalog with styling suggestions, user reviews , and detailed product metadata to support informed decisions.	
Lane Detection for Advanced Driver Assistance Systems (ADAS)	<i>Jan–May 2025</i>
Built a Convolutional Neural Network (CNN) model for real-time lane detection using dashcam footage. Utilized Python and OpenCV for image preprocessing and edge detection to extract road features. Trained the model on labeled datasets to identify lane markings under various driving conditions including rain and low light. Integrated the model into an ADAS pipeline to assist in lane keeping and departure warnings, contributing to safer driving systems.	

POSITIONS OF RESPONSIBILITY

- Worked as a coordinator for MAHOTSAV, which is an annual national-level festival hosted by Vignan’s Foundation for Science, Technology Research. As a coordinator, I was responsible for participant registrations, coordinating schedules, contributing to the event’s overall success.
